

# SPACE GODS

LEGAL CANNABIS  
SPACE GUMMIES  
HEMP DERIVED Δ9THC

## ✿ WHAT IS SPACE GODS? ✿

A Hemp extracted 'Full Spectrum' edible which provides the full benefits of the Hemp plant giving users a 1:1 ratio of 15mg psychoactive Delta 9 with 15mg of non-psychoactive cannabinoids CBD,CBN,CBG to give customers the full bodily experience that Hemp offers.

## HOW IS THE QUALITY?

Raw materials are sourced from a leading Hemp Farm in Colorado and manufactured in a GMP Registered ISO 9001 accredited facility using a proprietary infusion method to give customers the best quality and effect possible in each one of our gummies. Our Full Spectrum Hemp oil has a 1:1 ratio with the Delta 9 and supporting cannabinoids naturally occurring which is superior to a traditional Delta 9 distillate.

## DO THE GUMMIES MELT?

The gummies are 'travel friendly' meaning they are resistant to melting unless subjected to VERY high temperatures for a prolonged period of time. They are stable in cold or hot temperatures but not extreme heat.

# WHAT TYPE OF CUSTOMER IS A SPACE GODS CUSTOMER?

Space Gods has one of the broadest customer reaches that a product can have because many Adults are 'turning the leaf' on Cannabis and giving themselves the green light to experiment. Our customers range from the grandmother looking for added relief, the dad who wants to chill out by the grill on a Sunday with the family, the customer

searching for an extra 3 hours of sleep each night, the bachelor looking to crash his best friend's wedding with a good time, the athlete looking for new ways to aid himself in recovery, the video gamer wanting to enhance his experience or even Karen who can't stand the happy neighbors and is in need of relief - we support almost everyone's idea of a good time - on earth or in space.

## CAN SPACE GODS HELP CUSTOMERS WHO ARE JUST LOOKING FOR RELIEF?

Beyond the head change - Space Gods also offers relief for a broad range of consumers. Hemp will not treat or cure any ailments but what it can do is give users temporary relief with benefits so they can carry on throughout life a little lighter safely; without the dreaded hangover or detrimental health effects of other common options.

## WHEN A CUSTOMER ASKS 'WHAT IS A GOOD DOSE FOR ME?' OR 'HOW MUCH SHOULD I START WITH?'

The average dose is between ½ a gummy to 1 full gummy. More experienced users may increase their dose at their own discretion. Due to the psychoactive nature of this product do not drive or operate machinery while using SPACE GODS products.

***Safe first dose: ½ a gummy. (test the waters)***  
***Bold first dose: 1 gummy. (jump in the pool)***

It's best to allow the customer to use their own discretion and you can be a guiding hand for them in that conversation. You can ask if they have any prior experience with Delta 9 THC and if so, how was the experience and how many mgs did they take? If they

respond with "it gave me a bad experience" then that typically means they overshot their dose. In that scenario I would explain how the dose creates the experience so if they were open to trying again but this time to be safe - they can begin with a ½ of a gummy and wait 45 minutes and to expect a subtle warmness to come over their body and a slight head change of relaxation. If the dose had that effect then great and if it had little to no effect then the customer can increase their dose until the desired effect is met. We suggest ½ gummy increase at a time. The golden rule is you can always add more but you cannot take away once you have added more.
